

fix this code. I want the "all about me" page to be 2 complete paragraphs from the text I have. I don't want to alter the text unless it is for grammar or spelling.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>All About Me - Alina</title>

[Upgrade](#)[Ask ChatGPT](#)[Show more](#)

Yes. I can simplify the “All About Me” section so that it contains **exactly two complete paragraphs**, using the text you already wrote and only correcting grammar/spelling. I’ll leave the rest of your website structure and styling intact.

Fixed All About Me Section

```
<!-- About -->
<section id="about">
  <h2>Hello!</h2>
```

This gives you **two complete paragraphs** under “Hello!” without adding new ideas or changing the meaning of what you wrote.

make it HTML

Absolutely — here is the **HTML code only** for the “All About Me” section, with your original wording and only grammar/spelling corrections.

All About Me HTML

```
<!-- About -->
<section id="about">
  <h2>Hello!</h2>
```

rewrite the code with the style things added to it.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width,
initial-scale=1.0">
  <title>All About Me - Alina</title>

  <style>
    * {
```

Show more ▾

Absolutely. I kept your **existing styling, navigation, sections, and wording**, but changed the “All About Me” / About section so that it is **two complete paragraphs** instead of the separate short paragraph. I also kept the rest of your page intact.

    AI has already shown up in my life in different ways. For exam
    I have used AI for grammar and writing help on essays in high
    school, including tools like ChatGPT. One thing that concerns
    about AI is its environmental impact, especially its effect on
    water resources. As AI technology continues to grow, I think i
    is important to consider not only what AI can do, but also the
    environmental resources required to develop and use it.

Out of all the course objectives, I am most interested in identifying and discussing ethical issues surrounding AI. This matters to me because I believe the impact of a technology is just as important as how we use it. AI has so much potential for improvement and innovation, but it is also important to think about the consequences that can come with its use.

One important change: I added `margin-bottom` to section `p` so the two paragraphs in **Hello!** have a visible space between them while keeping the same overall purple/white design.

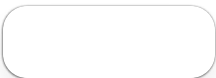

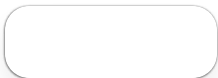

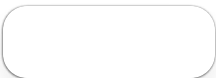

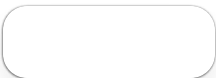

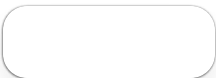

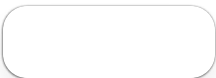

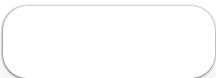

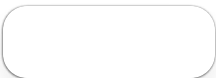

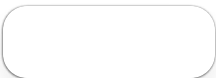

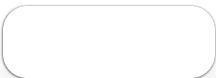

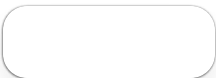

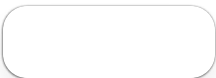

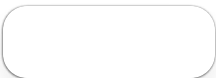

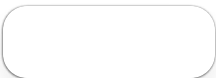

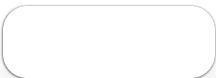

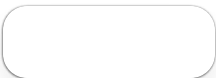

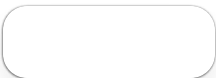

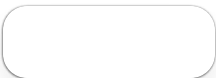

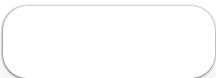

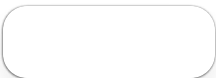

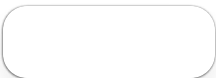

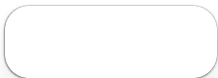

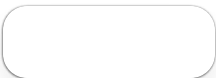

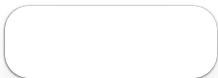

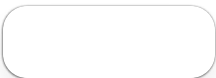

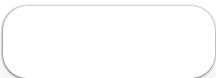

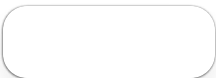

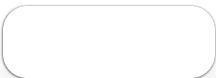

Absolutely. Paste your current **Course Objectives code**, and I'll keep the exact styling you already have while integrating the working navigation IDs (`history` , `ethics` , `search` , `machine-learning` , and `generative-ai`).
